Diaphragm tank as a surge arrester

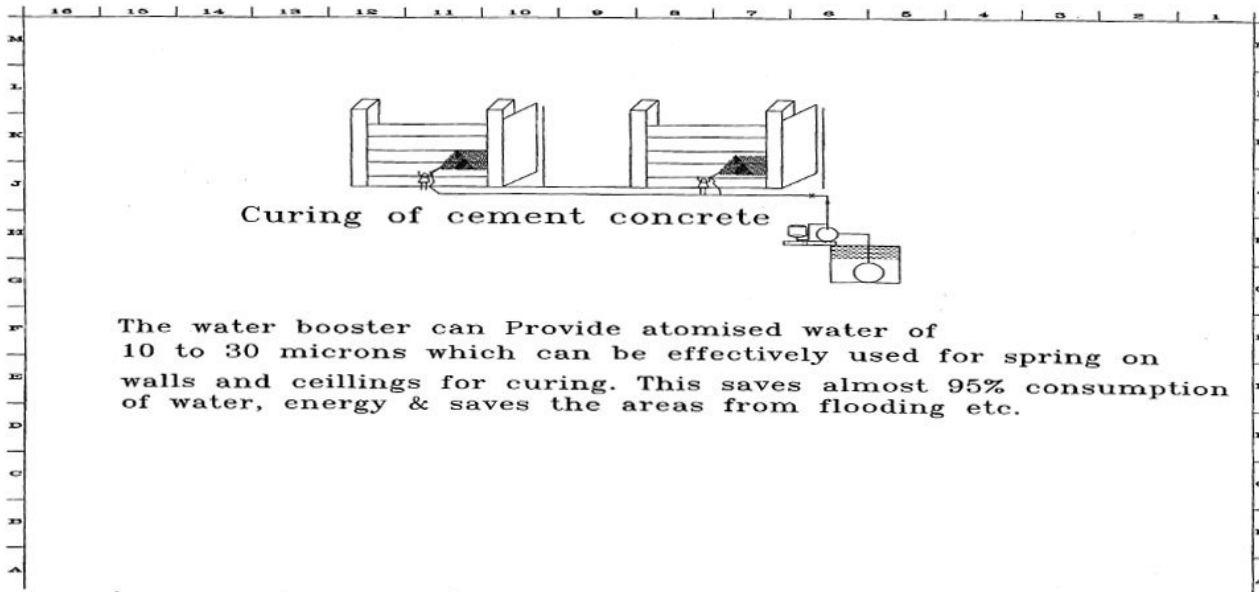

Pressure Water Supply With emergency overhead tank with Automatic Filling

Hydro Boost separate source of cold water & hot water systems.

Automatic Multiple Overhead tanks, One Water Booster For Filling ball cock valve

Curing of cement concrete

The water booster can Provide atomised water of 10 to 30 microns which can be effectively used for spring on walls and ceillings for curing. This saves almost 95% consumption of water, energy & saves the areas from flooding etc.
